

# About TrackStick

Tracksticks™ are small GPS location recorders capable of continuously logging their own location histories for extended periods of time. These detailed recordings include time, date, location, speed, heading and altitude. Built-in flash memory and long battery life allows for the storage of months of travel information.

## Where it works

The Trackstick™ will work anywhere on the planet. Using the latest in GPS mapping technologies, your exact location can be shown on satellite-based maps and 3D geographical terrain.

The Trackstick™ micro-computer can even calculate how long you have been indoors. While visiting family, friends or even shopping, the Trackstick™ can accurately time and map each and every place you have been.

## Route Tracing

When histories are viewed, Trackstick™ overlays a red line on the map indicating where you've traveled. The location and length of each stop is clearly indicated on each map making it easy to see each and every place the Trackstick™ has been. Histories can also be outputted to most mapping services.

## Major challenge for all fleet operators

How do you manage drivers, vehicles, plant and other mobile assets when they are "out-on-the-road" and effectively out of sight? Having the ability to see where your vehicles have been is fundamental in managing operations.

## Trackstick pays for itself and saves you money

*Overtime Claims* – Save \$1000's in reduced overtime payments.

*Productivity* – Increase capacity by between 10 and 15 per cent.

*Fuel Management* – Reduce your fuel bills by more than 10%.

*Insurance costs* – better contained through monitored driver behaviour.

## Employee Management

Better managed payroll with accurate timesheets and overtime claims. Overview of private motoring. Prevention of unauthorised vehicle use.

## Legislative Compliance

Monitor working hours. Powerful reports to satisfy both Accounting & Government requirements.

## Duty of Care

Improved driver behaviour minimises vehicle accident rate.

## Superior Security & Protection

Passive tracking of stolen vehicles. Provides detailed pre-accident data for driver assistance analysis.

*Trackstick Pro provides you with a cost effective tracking device that tells you where your drivers have been, start and stop times, driving route speed and more.....*

# TrackStick Mini

**NEW!**

The TrackStick Mini is the smallest GPS tracker in its class and has a new and improved GPS receiver with up to seven times more sensitivity than any other Trackstick model.

The detachable weatherproof and shock resistant case and magnetic mount make the Trackstick Mini ideal for **covert deployment** and use in harsh conditions.

Trackstick Mini works anywhere, it's traveled locations can be shown as a clear red line traced on satellite photos and 3D terrain using the latest mapping technologies.\*

The Trackstick Mini continuously records its exact route, stop times, speed, direction, altitude, and other valuable information, which can be quickly downloaded and viewed on your computer. The integrated temperature recorder ensures that all aspects of its environment are being monitored. A vibration detector, combined with proprietary low-power GPS technology makes Trackstick Mini the longest running GPS tracker on the market.

The Trackstick Mini runs on a built-in lithium-ion battery that can be recharged through your computer's USB port.

**No monthly fees** are required and Trackstick Manager, the most advanced tracking and **geo-photo tagging software** on the market, is provided freely in our download section.

Order online at  
[www.trackstickonline.com](http://www.trackstickonline.com)

- 9cm x 3.8cm x 1cm
- -160 dBm GPS receiver (7x more sensitive than our previous models)
- 360° GPS antenna (no need to face the sky)
- Receiver frequency of 1575.42 MHz with 32 receiving channels
- USB 2.0 data retrieval and charging
- Weather protective rubber boot and detachable magnetic mount
- Integrated directly into Google™ Earth and other online mapping for world wide use
- Records 16,000 waypoints (equivalent to months of route and driving history)
- Built-in rechargeable lithium-ion battery
- Vibration detector for long battery life
- Built in temperature
- Recorded histories are encrypted and requires a Windows™ XP or Vista™ computer to download
- MADE IN THE USA

# TrackStick Pro

Unlike the portable Trackstick™ models, the Trackstick Pro™ is conveniently powered by an included cigarette-lighter plug, and can even be hard-wired to any vehicle.

With 4Mb of memory, the Trackstick Pro™ can log weeks or even months of route histories. User-selectable features allow the record time to be changed from a recording interval of every 5 seconds, or from 1 minute up to every hour. A "first in, first out" memory cache will keep on recording new routes while erasing the oldest ones first.

The Trackstick Pro™ can be permanently mounted on a vehicle in plain sight, covertly installed, or removed from the cradle and placed on the dashboard. An internal software alarm will time-stamp any power interruptions and can be viewed when the data is downloaded. The weatherproof case allows Trackstick Pro™ to be mounted almost anywhere inside or out via the detachable cradle and screw pads.

Trackstick's™ technology enables a continuously updated record history of the exact route, stop times, speed and direction. All information can easily be downloaded to your computer via the included USB cable and quickly viewed on Google Earth's™ 3D model of the planet.

**No monthly fees are required and all software needed to use Trackstick Pro™ is included.**

- 6.5cm X 5cm X 1.9cm
- 2.5 Metre Accuracy
- Built in USB 2.0 port
- Weatherproof case and detachable cradle.
- Firmware alarm notifies of any power interruptions.
- **4Mb** flash memory records months of location histories.
- Runs on 5 – 24 volts DC with less than 6mA during normal operation.
- Built in temperature recorder -10°C to +60°C +/- 1°C
- Can be powered by the on-board USB port and plugged into any computer.
- "Live Track" maps its actual location in real time. (not for remote viewing over the internet, local use only)
- Integrates directly into Google Earth™ for worldwide use.
- Fully compatible with all versions of Trackstick™ Manager Software, Microsoft™ Streets and Trips™ and other off the shelf programs via .CSV file format.
- Requires Windows™ XP or 2000 compatible computer with USB1.1/2.0 port for mapping and data retrieval.
